Remediation Project Site Manager Mt Rosser, Jamaica

Rio Tinto Alcan, following the very successful closure and revegetation of their former bauxite residue tailing sites at Kirkvine, Rio Tinto Alcan are currently undertaking similar work at their 40 hectare site at Mt Rosser. We are looking to recruit a self-motivated and experienced Manager to lead our world class, environmental, civil engineering and water treatment project. Rio Tinto demands a world class performance in its delivery of Health, Safety and Environmental standards and central to this is the leadership and development of its workforce, and contractors and its engagement with the local community and key stakeholders.

Managerial Competencies

The successful candidate will have a degree in engineering with a sound comprehension of the environmental sciences and at least 5 years' experience in the project management of multi discipline teams utilising heavy earth moving equipment. Whilst technical support will be provided by our international legacy group, the post requires a competency in a full range of duties including, planning, operations management, environmental groundwater testing and monitoring, local procurement, cost control and liaison with environmental regulators and other key stakeholders. Experience in the operation of a bauxite residue pond would be a distinct advantage.

The appointment comes with a competitive salary and a fully expensed 4x4 vehicle. The successful person will need to have a clean drivers licence and be prepared to relocate in commuting distance to Mt Rosser if necessary. The successful candidate will require the following qualifications:

Qualifications

- Degree in engineering and water treatment project
- Competent in field of water / soil chemistry and environmental monitoring/ reporting
- Minimum 5 years' experience in the project management of multi discipline teams utilising heavy earth moving equipment.
- Clean drivers licence

Essential characteristics

- Self-motivated, experienced team manager
- Demonstrative leadership in Health, Safety, Environmental and community engagement
- People, Vision, planning and reporting skills
- Open and honest with a determination to meet agreed deadlines
- A committed work ethic
- Strong computer skills to handle spread sheets and management data

Highly desirable

- Experience in operation or closure of bauxite residue tailings facilities
